OMRON

Oil-resistant Limit Switches

Even Better Oil Resistance Than D4E-N Switches

- HNBR/fluororubber used for superior resistance to oil. Prevents infiltration of oil from moving sections.
- Fluorine resin cable that withstands cutting oils is provided as a standard feature.
- Models available with SmartClick connectors for each connection.
- Minute load model with gold cladding is optimal for electronic control.
- Approved by EN (TÜV).
- Same mounting pitch as D4E-N Switches.
- IP67G degree of protection (JIS C0920 Annex 1) *

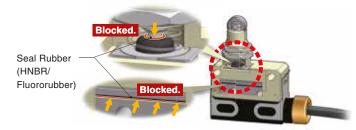

Be sure to read *Safety Precautions* on page 11 to 12 and *Safety Precautions for All Limit Switches*.

HNBR/Fluororubber for Superior Resistance to Oil

Important Sealing Sections

Rubbe

Applications

Table Overrun Detection

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

 The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards).
The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.

Standard-feature Fluorine Resin Cable That Withstands Cutting Oils

In addition to prewired models, models are also available with prewired SmartClick connectors for easy connection.

Table Position Detection

Model Number Structure

Model Number Legend (Not all combinations are possible. Ask your OMRON representative for details.)

D4ER-

(1)(2)(3)(4)

(1) Rated Current

1: 1 A at 30 VDC 2: 0.1 A at 30 VDC

(2) Actuator

- A: Roller plunger
- B: Crossroller plunger
- C: Plunger
- D: Sealed roller plunger
- E: Sealed crossroller plunger
- G: Roller lever
- L: Long roller plunger

(4) Pre-wired Connector

-DTK1EJ: Pre-wired connector

(30-cm oil-resistant cable, M12 Smartclick connector) None : No connector (oil-resistance cable: 2 m)

Note: D4ER-ON Switches are not available with operation indicators.

Ordering Information

(3) Terminals

- 21: Cable (right-hand)
- 22: Cable (left-hand)

Note: The terminal specifications in model numbers are not the same for D4ER-□N and D4E Switches.

Comparison of New and Old Terminal Models

D4ER-<u>1</u> G <u>21</u> N I II III

Model			Applicable category	Thermal current	
	I	11	III	and ratings	(Ithe)
	1		21/22	DC-12 1 A/30 VDC	1A
	2		21/22	DC-12 0.1 A/30 VDC	0.1A

Note:1. : Actuator variation of item II

2. DC-12 1 A/30 VDC means as follows: Applicable category: DC-12 Rated operating current (I_e): 1 A Rated operating voltage (U_e): 30 VDC

Characteristics

Degree of pro	tection	IP67 (IEC 60529) and IP67G (JIS C0920 Annex 1) *		
	Mechanical	4,000,000 operations min.		
Durability	Electrical	500,000 operations min. (1 A at 30VDC, resistive load) 4,000,000 operations min. (10 mA at 24 VDC, resistive load)		
Operating spe	eed	0.1 mm/sec to 0.5 m/sec		
Operating fre	quency	Mechanical: 120 operations/min Electrical: 30 operations/min		
Rated frequer	ncy	50/60 Hz		
Insulation res	istance	100 MΩ min. (at 500 VDC)		
Contact resis	tance	15 m Ω max. (initial value for the built-in switch when tested alone)		
Dielectric	Between terminals of same polarity	1,000 VAC, 50/60 Hz for 1 min		
strength	Between each terminal and non- current-carrying metal part	1,500 VAC, 50/60 Hz for 1 min/Uimp at 2.5 kV (EN60947-5-1)		
Rated insulat	ion voltage (Ui)	250V		
Pollution deg	ree (operating environment)	3 (EN60947-5-1)		
Short-circuit	protective device (SCPD)	10 A fuse (type gG or gI, IEC60269 approved)		
Conditional s	hort-circuit current	100 A (EN60947-5-1)		
Conventional	enclosed thermal current (Ithe)	5 A (EN60947-5-1)		
Protection ag	ainst electric shock	Class II (grounding not required with double insulation)		
Vibration resistance	Malfunction	10 to 55 Hz, 1.5-mm double amplitude		
Shock	Destruction	1,000 m/s ² max. (IEC68-2-27)		
resistance	Malfunction	300 m/s ² max. (IEC68-2-27)		
Ambient oper	ating temperature	+5°C to +80°C (with no icing)		
Ambient oper	ating humidity	35% to 95%RH (with no condensation)		
Weight		(in case of roller plunger) Cable type (2m): Approx. 140 g Pre-wired Connector type: Approx. 103 g		

Note:1. The following values are initial values.

2. The following ratings may vary depending on the model. Contact your OMRON representative for further details.

* The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards). The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.

		10 A max.
current	NO	10 A max.

Note:1. The above current ratings are for a standard current.

 Inductive loads have a power factor of 0.4 min. (AC) and a time constant of 7 ms max. (DC).

3. Lamp load has an inrush current of 10 times the steady-state current.

4. Motor load has an inrush current of 6 times the steady-state current.
