

Two-circuit Limit Switch/Long-life Two-circuit Limit Switch WL-N/WLM-N

Select the Best Two-circuit Switch for the Operating Environment and Application from a Wide Range of Models

- A wide selection of models is available, including General-purpose, Environment-resistant, and Spatter-prevention Switches.
- Standard-feature gold-clad crossbar contacts provide high reliability.
Applicable to either standard loads or microloads.
- Switches with Lever Actuators provide 90° overtravel, one-side operation, and four-direction head mounting.
- Approved standards: EN/IEC, UL, cUL, and CCC.
Contact your OMRON representative for information on approved models.

! Be sure to read **Safety Precautions** on page 44 to 48 and **Safety Precautions for All Limit Switches**.

Features

Standard Switches

Many Variations in Standard Limit Switches A Wide Range of Models

The series includes many different actuators that you select to match the workpiece shape and motion, and a wide range of Switch variations, such as models with operation indicators for easier working and maintenance and models with different types of connectors.

Environment-resistant Switches

Select from Six Types of Environment Resistance

The series includes Airtight Switches, Hermetic Switches, Heat-resistant Switches, Low-temperature Switches, Corrosion-proof switches, and Weather-proof Switches. You can select the model based on the onsite environment.

Spatter-prevention Switches

Excellent Performance on Arc Welding Lines or Sites with Spattering Cutting Powder Ideal for Welding Sites

These Switches use stainless steel or resin to prevent the adhesion of spatter.
They can be used to reduce problems caused by zinc power generated during welding.

Long-life Switches

Mechanical Endurance of 30 Million Operations Long-life Models for High-frequency Applications

A mechanical durability of 30 million operations minimum is provided. The head features a double-seal structure with a head cap and oil seal.

Features Common to All Switches

DPDB Operation

The double-pole, double-break structure ensures circuit braking.

Degree of Protection; IP67

Approved Standards to Aid Export Machines

The Switches are certified for EN/IEC, UL, cUL, and CCC making them ideal for export machines.

Applicable to Either Standard Loads or Microloads

Standard-feature gold-clad contacts provide high reliability. The use of a high-contact-pressure crossbar structure also increases reliability.

Easy to Work With

Downsizing of the built-in switch has increased the space to house the wiring.
The insulating paper that was often in the way when wiring has been eliminated.
Nickel-plated steel screws are used for the terminal screws. The screws adhere to magnetized screwdrivers to prevent dropping and losing them.

Models with Connectors to Reduce Wiring

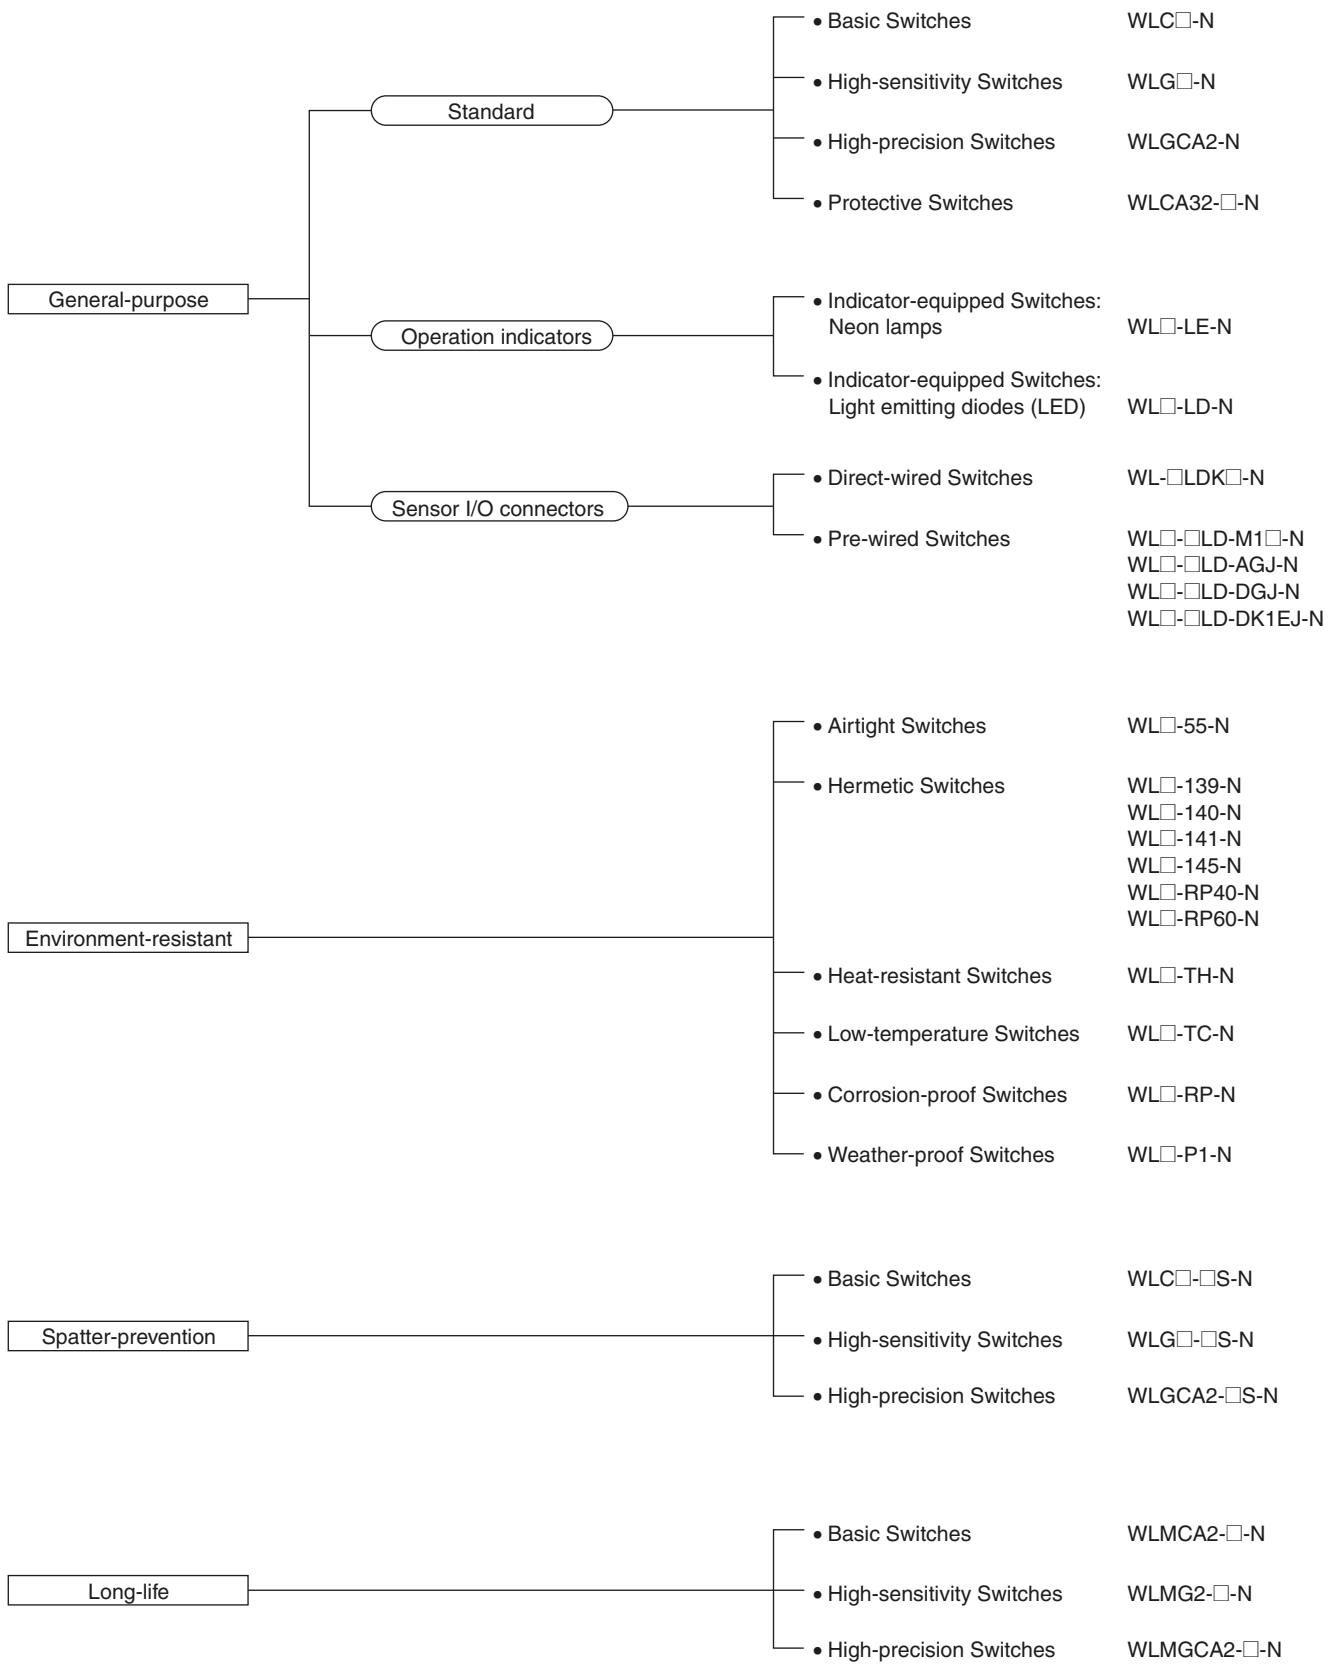

A neon lamp or LED indicates the operating status. The 3D structure of the lamp cover disperses light so you can check the operating status from the side.

Product Configuration

Environment-resistant Switches

Type	Item		Environment-resistant		
	Model	Application	Environment-resistant construction	Applicable models	
Airtight seal	WL□-55-N	For uses in locations subject to cutting oil or water	Uses an airtight built-in switch. Note: Use the SC Connector for the conduit opening.	All models except the low-temperature and heat-resistant models Note: Models can be produced using standard actuators.	
	WL□-139-N WL□-140-N WL□-141-N WL□-145-N WL□-RP40-N WL□-RP60-N		Refer to page 29 for information on the environment-resistant construction of Switches with Hermetic Seals.	All models except the low-temperature and heat-resistant models Note: Models can be produced using standard actuators. Only the WLCA2-N, WLGCA2-N, or WLG2-N can be produced for the WL□-141-N and WL□-145-N.	
Low-temperature	WL□-TC-N	Can be used at a temperature of -40°C (operating temperature range: -40 to 40°C), but cannot withstand icing.	<ul style="list-style-type: none"> • Uses a general-purpose built-in switch. • Epichlorhydrin rubber is used for rubber parts such as the O-ring, gasket, etc. 	All models except airtight seal, hermetic seal, heat-resistant, corrosion-proof, and indicator-equipped models	
Heat-resistant	WL□-TH-N	Can be used in temperatures of 120°C (operating temperature range: 5 to 120°C).	<ul style="list-style-type: none"> • Fluorine rubber is used for rubber parts such as the O-ring, gasket, etc. 	All models except airtight seal, hermetic seal, heat-resistant, corrosion-proof, and indicator-equipped, nylon roller (WLCA2-26N-N), seal roller models, and resin rod (WLNJ-2-N) models	
Corrosion-proof	WL□-RP-N	For use in locations subject to corrosive gases and chemicals.	<ul style="list-style-type: none"> • Diecast parts, such as the switch box, are made of corrosion-proof aluminum. • Rubber sealing parts are made of fluorine rubber, which aids in resisting oils and chemicals. • Exposed nuts and screws (except the actuator section) are made of stainless steel. • Moving and rotary parts such as rollers are made of sintered stainless steel or stainless steel. • The Head, box, and cover are yellow. 	All models except fork lever lock (WLCA32-41 to -44-N), low-temperature, heat-resistant, and indicator-equipped models	
Weather-proof	WL□-P1-N	For use in parking lots and other outdoor locations.	<ul style="list-style-type: none"> • Rubber parts are made from epichlorhydrin rubber, which has a high-tolerance to changes in temperature. • Rollers are made of stainless steel to improve corrosion resistance. • Exposed nuts and screws are made of stainless steel. 	Only basic (WLCA2-N/CA12-N/CL-N), and high-sensitivity overtravel (WLG2-N/G12-N/GL-N) models (excluding heat-resistant models). This does not apply to Low-temperature or Heat-resistant, or Indicator-equipped Switches.	

Selection Guide

With the WL-N Series, OMRON will combine the switch, Actuator, and wiring method required to build the ideal switch for your application.

The WL-N Series consists of four basic types: General-purpose, Environment-resistant, Spatter-protection, and Long-life Switches. WLCA2-N Switches can be used for the most common applications.

According to Operating Environment

Environment	Key specifications	Models	
Ambient operating temperature	<p>Normal</p> <p>Temperature range: -10°C to $+80^{\circ}\text{C}$</p> <p>Water-resistant to IP67.</p>	<p>WL□-N General-purpose Switches</p> <p>WLM□-N Long-life Switches</p>	
	<p>High-temperature</p> <p>Temperature range: $+5^{\circ}\text{C}$ to $+120^{\circ}\text{C}$</p> <p>To increase heat resistance, the rubber material (fluorine rubber) and the plunger material (PEEK) have been changed.</p>	<p>WL□-TH-N Heat-resistant Switches *1</p>	
	<p>Low-temperature</p> <p>Temperature range: -40°C to $+40^{\circ}\text{C}$</p> <p>To increase resistance to cold, epichlorhydrin rubber and other measures are used.</p>	<p>WL□-TC-N Low-temperature Switches *1</p>	
Operating environment	<p>Outdoors</p> <p>Rubber parts are made from epichlorhydrin rubber, which has a high-tolerance to changes in temperature. Stainless steel is used for the screws. Rollers are made of stainless steel to provide superior corrosion resistance.</p>	<p>WL□-P1-N Weather-proof Switches *1</p>	
	<p>Chemicals and oil</p> <p>Corrosion-proof specifications have been used for the housing, fluorine rubber has been used for rubber parts, and stainless steel has been used for screws and nuts (except for the actuator) to increase resistance to oils, chemicals, and weather.</p>	<p>WL□-RP-N Corrosion-proof Switches *1</p>	
	<p>Water drops and mist</p> <p>Uses an airtight built-in switch.</p>	<p>WL□-55-N Airtight Switches *1</p>	
	<p>Constant water drops and mist</p>	<p>Cables are attached. Uses a general-purpose built-in switch. The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.)</p>	<p>WL□-139-N Hermetic, Molded-terminal Switches *1, *2</p>
		<p>Cables are attached. Uses an airtight built-in switch. The case cover and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.) The SC connector can be removed, so it is possible to use flexible conduit for the cable.</p>	<p>WL□-RP40-N Hermetic, Molded-terminal Switches *1, *2</p>
		<p>Cables are attached. Uses an airtight built-in switch. The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.)</p>	<p>WL□-140-N Hermetic, Molded-terminal Switches *1, *2</p>
	<p>Constant water drops or splattering cutting powder</p> <p>Cables are attached. Uses an airtight built-in switch. The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.) Double seal against oil including head cap countermeasure for cutting chips and an oil seal.</p> <p>-141: The Head section is molded from epoxy resin; Head direction cannot be changed.</p> <p>-145: The Head section is molded from epoxy resin; Head can be in any of 4 directions.</p>	<p>WL□-141-N, -145-N Hermetic, Molded-terminal Switches *1, *2 (Only the WLCA2-N, WLG2-N, and WLGCA2-N, can be produced.)</p>	
<p>Coolant</p> <p>Cables are attached. Uses an airtight built-in switch. The cover screws, case cover, conduit opening, and head screws are molded from epoxy resin to increase the seal. (The cover and head cannot be removed.) Rubber parts are made from fluorine rubber to increase resistance to coolant.</p>	<p>WL□-RP60-N Hermetic, Molded-terminal Switches *1, *2</p>		
<p>Spattering from welding</p> <p>To prevent spatter during welding, a heat-resistant resin is used for the indicator cover and screws and rollers are all made from stainless steel.</p>	<p>WL□-S-N Spatter-prevention Switches</p>		

*1. Not all functions can be combined with environment-resistant switches. Refer to the applicable models on the previous page.

*2. Refer to page 29 for information on the construction of Hermetic Switches.

According to Application Conditions

	Conditions	Key specifications	Models
Load	Switching standard loads	10 A at 125,250, or 500 VAC 0.8 A at 125 VDC 0.4 A at 250 VDC	Entire WL□-□-N Series Applicable to either standard loads or microloads.
	Switching microloads	0.1 A at 125 VAC, resistive load 0.1 A at 30 VDC, resistive load	
Durability	Normal durability	Mechanical: 15 million operation min. (10 million operation min. for high-sensitivity models or flexible rod models)	WL□-N General-purpose Switches WL□-S-N Spatter-prevention Switches
	Long-life	Mechanical: 30 million operation min.	WLM□-N Long-life Switches

According to Ease of Installation and Maintenance

	Conditions	Key specifications	Models
Operation indicator	Daily inspections and maintenance checks	Neon lamp 125 to 250 VAC Switching light-ON between operating/not operating. (Switching is not possible for Switches with Molded Terminals.)	WL□-LE-N General-purpose, Indicator-equipped (Neon Lamp) Switches WL□-LES-N Spatter-prevention, Indicator-equipped (Neon Lamp) Switches
		LED 10 to 115 VAC/DC Switching light-ON between operating/not operating. (Switching not possible for models with molded terminals.)	WL□-LD-N General-purpose, Indicator-equipped (LED) Switches WL□-LDS-N Spatter-prevention, Indicator-equipped (LED) Switches
Wiring specification	Screw tightening and installation	Screw terminals. No ground terminal. Conduit size: G1/2	WL□-N General-purpose Switches WLM□-N Long-life Switches
		Screw terminals. Ground terminal. Conduit size: 4 sizes	WL□-N General-purpose Switches
	One-touch connector attachment	Direct-wired connector, 2-conductor. Greatly reduces wiring work.	WL□-□LDK13□-N General-purpose, Direct-wired Connector Switches WLM□-LDK13□-N Long-life, Direct-wired Connector Switches
		Direct-wired connector, 4-conductor. Greatly reduces wiring work.	WL□-□LDK43□-N General-purpose, Direct-wired Connector Switches WLM□-LDK43□-N Long-life, Direct-wired Connector Switches
	Connector attachment in control and relay boxes	Pre-wired connector, 2-conductor. Greatly reduces wiring work. Smartclick connectors for even easier maintenance.	WL□-□LD-M1□J-N General-purpose, Pre-wired Connector Switches WL□-□S-M1□J-1-N Spatter-prevention, Pre-wired Connector Switches WLM□-LD-M1□J-N Long-life, Pre-wired Connector Switches
		Pre-wired connector, 4-conductor. Greatly reduces wiring work. Smartclick connectors for even easier maintenance.	WL□-□LD-□GJ-N General-purpose, Pre-wired Connector Switches WL□-□S-□GJS-N Spatter-prevention, Pre-wired Connector Switches WLM□-LD-□GJ-N Long-life, Pre-wired Connector Switches

Connector Pin Layout Diagram

AC

DC

Note: Leakage current from indicator circuit may cause load malfunction (i.e., the load may remain ON). Make sure that the load operating current is higher than the leakage current. For countermeasures, refer to technical support on your OMRON website.

*1. Light-ON when not operating means the indicator is lit when the actuator is free and is not light when the Switch contacts (NO) close when the actuator rotates or is pushed down.

*2. The position of the positioning piece is not always the same. If using an L-shaped connector causes problems in application, use a straight connector.

		250	5	—	—	—	—		
	DC	125	0.4	—	—	—	—		
		250	0.2	—	—	—	—		

- Note:**
- The above figures are for steady-state currents.
 - Inductive loads have a power factor of 0.4 min. (AC) and a time constant of 7 ms max. (DC).
 - A lamp load has an inrush current of 10 times the steady-state current.
 - A motor load has an inrush current of 6 times the steady-state current.
 - For PC loads, use the microload models.

Inrush current	NC	30 A max.(15 A max. *)
	NO	20 A max.(10 A max. *)

* For high-sensitivity switches.

Minimum applicable load	5 VDC 1 mA, resistive load, P level
-------------------------	-------------------------------------

Operation indicator Switches

Model	Item	Max. rated voltage	Leakage current (mA)
WL-LE-N	Neon lamp	125 AC	Approx. 0.6
		250 AC	Approx. 1.9
WL-LD-N	LED	10 to 24 VAC/DC	Approx. 0.4
		115 VAC/DC	Approx. 0.5

Characteristics

Degree of protection	IP67	
Durability *1	Mechanical	15,000,000 operations min. *2
	Electrical	750,000 operations min. *3
Operating speed	1 mm/s to 1 m/s (in case of WLCA2-N)	
Operating frequency	Mechanical	120 operations/minute min.
	Electrical	30 operations/minute min.
Rated frequency	50/60 Hz	
Insulation resistance	100 MΩ min. (at 500 VDC)	
Contact resistance	25 mΩ max. (initial value for the built-in switch when tested alone)	
Dielectric strength	Between terminals of the same polarity	1,000 VAC (600 VAC), 50/60 Hz for 1 min
	Between currentcarrying metal part and ground	2,200 VAC (1,500 VAC), 50/60 Hz for 1 min *4
	Between each terminal and non-currentcarrying metal part	2,200 VAC (1,500 VAC), 50/60 Hz for 1 min *4
Vibration resistance	Malfuction	10 to 55 Hz, 1.5-mm double amplitude *5
Shock resistance	Destruction	1,000 m/s ² max.
	Malfuction	300 m/s ² *5
Ambient operating temperature	-10 to +80°C (with no icing) *6	
Ambient operating humidity	35% to 95% RH	
Weight	Approx. 255 g (in case of WLCA2-N)	

- Note:**
- The above figures are initial values.
 - The figures in parentheses for dielectric strength are those for the high-sensitivity switches models.
- *1. The values are calculated at an operating temperature of +5°C to +35°C and an operating humidity of 40% to 70% RH. Contact your OMRON sales representative for more detailed information on other operating environments.
- *2. High-sensitivity Switches and Switches with Flexible Rod Actuators: 10 million operations min.
500,000 operations min. for weather-proof models.
- *3. Durability is 500,000 operations min. for high-sensitivity models.
500,000 operations min. for weather-proof models.
Contact your OMRON representative for information on Environment-resistant Switches.
- *4. Switches with Connectors: 1,500 V.
- *5. Except Switches with Flexible Rod Actuators.
- *6. For low-temperature models this is -40°C to +40°C (with no icing). For heatresistant models the range is +5°C to +120°C.

Structure and Nomenclature

Structure

General-purpose Switches: WLCA2-N

*1. The available conduit screws are Pg 13.5, M20 and 1/2-14 NPT.

Indicators

Indicator Covers

The indicator cover is an outsert molded from diecast aluminum and has outstanding sealing properties.

Indicator Windows

Operating status (i.e., light-ON when operating or light-ON when not operating) depends on whether a neon lamp or an LED is used.

Light-ON when Operating/Not Operating

Indicators can be switched from light-ON when operating and light-ON when not operating, by simply rotating the indicator holder by 180°.

Light-ON when Operating

Light-ON when Not Operating

Indicator

The indicator is either a neon lamp or an LED. Switches with LED indicators have a built-in rectifier stack, so there is no connection polarity.

Contact Spring

Use the terminal screws on the built-in switch to connect to the lamp terminals. A coil spring is used to make contact, so connecting to the lamp terminals is not necessary.

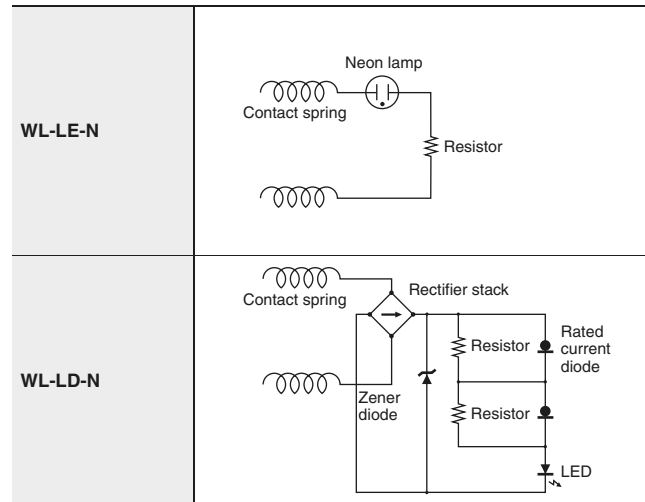

Lamp Holder

Operation

Internal Circuits

Note: 1. Leakage current from indicator circuit may cause load malfunction (i.e., the load may remain ON). Make sure that the load operating current is higher than the leakage current.

For countermeasures, refer to technical support on your OMRON website.

*1. Light-ON when operating means that the lamp lights when the Limit Switch contacts (NC) release, or when the actuator rotates or is pushed down.

*2. Light-ON when not operating means the lamp remains lit when the actuator is free, or when the Limit Switch contacts (NO) close when the actuator rotates or is pushed down.

Environment-resistant Switches

Molding Specifications for Hermetic Switches  : Molded parts

Model	Cable specifications	Connector type
WL-139-N	Standard 5-m VCT cable, with high flexibility and good anti-oil properties attached. Finished outer diameter: 11.5 mm, 4 conductors.	Resin cap
WL-140-N		Metal connector
WL-141-N		
WL-145-N		Resin connector *
WL-RP40-N		
WL-RP60-N		

* The connector can be removed, so it is possible to use flexible conduit for the cable.

Spatter-prevention Switches: WLCA2-LES-N

Actuator

Roller, Roller Axis

Using stainless steel prevents spatter from adhering.

Operating Lever

A baking finish is applied to the surface so that any adhering spatter is easily removed.

Roller Lever Bolt

Stainless steel construction to prevent spatter adherence.
Double nut models are also available.

Screws

Externally visible screws on the head and cover are made of stainless steel to prevent spatter adherence.

Head Cap

Using fluororesin prevents spatter from adhering.

* Spatter means the zinc powder produced when welding.

Adhering spatter to the Limit Switch may cause malfunction of lever or lamp cover.

The lack of gap prevents spatter powder from clogging.

Long-life Switches

Head

You can remove the two screws to mount the head in any of the four possible directions.

Shield Structure

A head cap and oil seal form a double-seal structure. Excellent durability and reliability are ensured.

Head Cap

The head cap helps prevent the entry of cutting chips. You can use the protrusion on the cap to confirm the set position.

Actuator

Roller

The roller is made of self-lubricating sintered stainless steel. It provides superior resistance to wear.

Lever

The lever is forged from anti-corrosive aluminum alloy. It provides superior corrosion resistance and outstanding strength. With a roller lever actuator, the actuator position can be set anywhere within 360°. (The lever cannot be mounted in the opposite direction.)

Operating Plunger

PEEK resin is used. It provides superior resistance to wear. You can change the mounting direction to use any one of the three operating directions (both sides, left side, or right side).

Built-in Switch

Built-in switch with an SPST-NO+NC contact form.

Terminal Screws

Four, M3.5 screws.

Cover Seal

High sealing performance is achieved. The seal also serves as a spacer. There is no troublesome insulating paper, making it easy to work with the Switch.

Cover Setscrew

A combination Philips-slotted screw is used. A retainer prevents the screw from falling from the cover even when the screw is loose.

Conduit Opening

In addition to parallel threads for G1/2 tubing, direct-wired and pre-wired connectors have been added to the series.

Only the external appearance of the set position indicator plate varies on high-sensitivity models.

Note: Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Operating characteristics		Model	WLCA2-N	WLCA2-2-N	WLCA2-2N-N	WLG2-N	WLCA2-7-N	WLCA2-8-N	WLGCA2-N
Operating force	OF	max.	13.34 N	13.34 N	13.34 N	13.34 N	10.2 N	8.04 N	13.34 N
Release force	RF	min.	1.18 N	1.18 N	1.18 N	1.18 N	0.9 N	0.71 N	1.18 N
Pretravel	PT		15±5°	25±5°	20° max.	10° ^{+2°} _{-1°}	15±5°	15±5°	5° ^{+2°} _{0°}
Overtravel	OT	min.	70°	60°	70°	80°	70°	70°	80°
Movement Differential	MD	max.	12°	16°	10°	7°	12°	12°	3°

Operating characteristics		Model	WLCA12-N *1	WLCA12-2-N *1	WLG12-2N-N *1	WLG12-N *1
Operating force	OF	max.	13.34 N	13.34 N	13.34 N	13.34 N
Release force	RF	min.	1.18 N	1.18 N	1.18 N	1.18 N
Pretravel	PT		15±5°	25±5°	20° max.	10° ^{+2°} _{-1°}
Overtravel	OT	min.	70°	60°	70°	80°
Movement Differential	MD	max.	12°	16°	10°	7°

*1. The operating characteristics for WLCA12-N, WLCA12-2-N, WLCA12-2N-N, and WLG12-N are measured at the lever length of 38 mm.

Switches with Roller Lever Actuators
Basic, High-sensitivity, and Protective Switches

Adjustable rod lever 25 to 140 mm

Basic

- WLCL-N
- WLCL-2-N
- WLCL-2N-N

* Stainless steel rod

Only the external appearance of the set position indicator plate varies on high-sensitivity models.

High-sensitivity
WLGL-N

Adjustable rod lever

Basic

- WLCAL4-N

* Stainless steel rod

Rod spring lever

Basic

- WLCAL5-N

* Piano wire

Fork lever lock
Protective Switches

- WLCA32-41-N
- WLCA32-42-N
- WLCA32-43-N
- WLCA32-44-N

The WLCA32-41-N is shown in the following diagram.

* Plastic Roller
 (The WLCA32-041-N to WLCA32-044-N have stainless steel rollers.)

Note: 1. Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Operating characteristics		Model	WLCL-N *1	WLCL-2-N *1	WLCL-2N-N *1	WLGL-N *1	WLCAL4-N *2	WLCAL5-N
Operating force	OF	max.	1.39 N	1.39 N	1.39 N	2.84 N	0.98 N	0.9 N
Release force	RF	min.	0.27 N	0.27 N	0.27 N	0.25 N	0.15 N	0.09 N
Pretravel	PT		15±5°	25±5°	20° max.	10° ±1°	15±5°	15±5°
Overtravel	OT	min.	70°	60°	70°	80°	70°	70°
Movement Differential	MD	max.	12°	16°	10°	7°	12°	12°

Note: The actuator on the WLCAL4-N and WLCAL5-N is heavy, which may result in resetting problems depending on the direction the Switch is mounted. Mount the Switch so that the actuator is facing downwards to prevent this problem from occurring.

*1. The operating characteristics for WLCL-N, WLCL-2-N, WLCL-2N-N, and WLGL-N are measured at the lever length of 140 mm.

*2. The operating characteristics of WLCAL4-N are measured at a rod length of 380 mm.

Operating characteristics	Model	WLCA32-41 to 44-N
Force necessary to reverse the direction of the lever	max.	11.77 N
Movement until the lever reverses		50±5°
Movement until switch operation	max.	55°
Movement after switch operation	min.	35°

Switches with Plunger Actuators

Basic Switches

Sealed Top Plunger

WLD18-N

Horizontal Plunger

WLSD-N

Sealed Top-roller Plunger

WLD28-N

Horizontal-roller Plunger

WLSD2-N

Sealed Top-ball Plunger

WLD38-N

Horizontal-ball Plunger

WLSD3-N

Note: Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Operating characteristics		Model	WLD18-N	WLD28-N	WLD38-N	WLSD-N	WLSD2-N	WLSD3-N
Operating force	OF	max.	26.67 N	16.67 N	16.67 N	40.03 N	40.03 N	40.03 N
Release force	RF	min.	8.92 N	4.41 N	4.41 N	8.89 N	8.89 N	8.89 N

Operating position	OP		34±0.8 mm	44±0.8 mm	44.5±0.8 mm	40.6±0.8 mm	54.2±0.8 mm	54.1±0.8 mm
Total travel position	TTP	max.	29.5 mm	39.5 mm	41 mm	—	—	—

Switches with Flexible Rod Actuators
Basic Switches

Coil Spring
WLNJ-N

- *1. Do not operate the Switch in the direction of the axial center.
- *2. Stainless steel coil spring.
- *3. The range for operation is 1/3rd of the overall spring length from the end of the spring.

Coil Spring (Multi-wire)
WLNJ-30-N

- *1. Do not operate the Switch in the direction of the axial center.
- *2. Piano wire coil spring.
- *3. The range for operation is 1/3rd of the overall spring length from the end of the spring.

Resin Rod
WLNJ-2-N

- *1. Do not operate the Switch in the direction of the axial center.
- *2. Polyamide Resin Rod
- *3. The range for operation is 1/3rd of the overall rod length from the end of the rod.

Steel Wire
WLNJ-S2-N

- *1. Do not operate the Switch in the direction of the axial center.
- *2. Stainless steel wire.
- *3. The range for operation is 1/3rd of the overall wire length from the end of the wire.

Note: Unless otherwise indicated, a tolerance of ± 0.4 mm applies to all dimensions.

Operating characteristics		Model	WLNJ-N	WLNJ-30-N	WLNJ-2-N	WLNJ-S2-N
Operating force	OF		1.47 N	1.47 N	1.47 N	0.28 N
Pretravel	Max. PT		20±10 mm	20±10 mm	40±20 mm	40±20 mm

* These values are for the top end of the spring, rod, or wire.

Sensor I/O connector Switches

(For details about applicable cables, refer to *Connecting Sensor I/O Connectors Cable and Socket* on page 16.)

Switches with Roller Lever Actuators

Switches with Direct-wired Connectors

Basic Switches

WLCA2-LDK13-N

High-sensitivity Switches

WLG2-LDK13-N

High-precision Switches

WLGCA2-LDK13-N

The only difference in the shape for High-sensitivity and High-precision Switches is the set position marker plate.

Switches with Pre-wired Connectors

Basic Switches

WLCA2-LD-M1J-N

High-sensitivity Switches

WLG2-LD-M1J-N

High-precision Switches

WLGCA2-LD-M1J-N

The only difference in the shape for High-sensitivity and High-precision Switches is the set position marker plate.

- Note:** 1. Unless otherwise indicated, a tolerance of ± 0.4 mm applies to all dimensions.
2. The following diagrams are for a indicator-equipped models.

Operating characteristics		Model	Basic Switches	High-sensitivity Switches	High-precision Switches
Operating force	OF	max.	13.34 N	13.34 N	13.34 N
Release force	RF	min.	1.18 N	1.18 N	1.18 N
Pretravel	PT		15 $\pm 5^\circ$	10 $^{\circ \pm 2}_{-1}$	5 $^{\circ \pm 2}_{0}$
Overtravel	OT	min.	70 $^\circ$	80 $^\circ$	80 $^\circ$
Movement Differential	MD	max.	12 $^\circ$	7 $^\circ$	3 $^\circ$

Operation indicator Switches

Safety Precautions

Precautions for Safe Use

- Be sure to ground. If not, there is the possibility that electrical shock occurs.
 - Do not touch charged switch terminals while the switch has carry current, otherwise there is the possibility that electrical shock occurs.
 - Do not disassemble the limit switch or touch inside of it under supplying power, otherwise there is the possibility that electrical shock occurs.
 - Do not touch the wire or rod type actuator in order to prevent injury.
 - Connect a fuse which has 1.5 to 2 times higher breaking current than the switch rated current to the switch in series in order to prevent the switch from short-circuit damage.
On the occasion when using the switch with GB ratings, use a 10A fuse that complies IEC60269, either type gG.
 - The durability of switch is depends on the operating condition. Be sure to check the condition with actual using condition before using, and use with the number of times of operating without a performance problem.
 - Do not drop the switch. Otherwise, there is the possibility that the switch functions may be spoiled.
 - Do not connect a Single Limit Switch to two power supplies that are different in polarity or type.
 - Be sure to keep the load current less than the rated value. Otherwise, there is the possibility that the switch may be damage and/or burnout.
 - Minimum operating load: 5 VDC 1 mA, resistive load, P level
- Note:** The P level indicates the standard malfunction level at a reliability level of 60% (λ_{60}).
(JISC5003) $\lambda_{60} = 0.1 \times 10^{-6}$ per operation, which indicates an estimated malfunction of 1 out of every 10,000,000 operations at a reliability level of 60%.
- Do not use the Switch by itself in atmospheres containing flammable or explosive gases. Arcs and heating resulting from switching may cause fire or explosion.
 - Be sure to prevent the foreign materials such like a scrapped cable intrusion in to the switch when wiring. Otherwise, there is the possibility of spoiling the normal operation.
 - Never wire to the wrong terminals.
 - Do not store or use the switch with following place.
 - Where the temperature fluctuates greatly
 - Where the humidity is very high and condensation may occur.
 - Where the vibration is too much
 - Where receiving direct sunshine.
 - Where receiving salty wind.
 - Do not disassemble and/or modify the switch at anytime. Otherwise, there is the possibility of spoiling the normal operation.
 - Do not apply the force such like deformation and/or degeneration to the switch. Otherwise, there is the possibility that the switch functions may be spoiled.

Precautions for Correct Use

Environment

- Take special care to use where there is fine powder, mud and/or foreign materials stacking. And check the condition with actual using condition before using. Then use without a performance problem.
- This switch is only for indoor use. If it is used in outdoor, it may be cause of switch failure.
- Do not keep the Switch in locations with corrosive gas, such as sulfuric gas (H_2S or SO_2), ammonium gas (NH_3), nitric gas (HNO_3), or chlorine gas (Cl_2), or high temperature and humidity. Otherwise, contact failure or corrosion damage may result.
- Seal material may deteriorate if a Switch is used outdoor or where subject to special cutting oils, solvents, or chemicals. Always appraise performance under actual application conditions and set suitable maintenance and replacement periods.
- Install Switches where they will not be directly subject to cutting chips, dust, or dirt. The Actuator and Switch must also be protected from the accumulation of cutting chips or sludge.

- Constantly subjecting a Switch to vibration or shock can result in wear, which can lead to contact interference with contacts, operation failure, reduced durability, and other problems. Excessive vibration or shock can lead to false contact operation or damage. Install Switches in locations not subject to shock and vibration and in orientations that will not produce resonance.
- The Switches have physical contacts. Using them in environments containing silicon gas will result in the formation of silicon oxide (SiO_2) due to arc energy. If silicon oxide accumulates on the contacts, contact interference can occur. If silicon oil, silicon filling agents, silicon cables, or other silicon products are present near the Switch, suppress arcing with contact protective circuits (surge killers) or remove the source of silicon gas.

Installing the Switch

- To install the Switch, make a mounting panel, as shown in the following diagram, and tighten screws using the correct torque.

Tightening Torque

- If screws are too loose they can lead to an early malfunction of the Switch, so ensure that all screws are tightened using the correct torque.
- In particular, when changing the direction of the Head, make sure that all screws are tightened again to the correct torque. Do not allow foreign objects to fall into the Switch.

No.	Type	Torque	Screw type
(1)	Head mounting screw	0.78 to 0.88 N•m	M3.5 screw
(2)	Cover mounting screw	1.18 to 1.37 N•m	M4 screw
(3)	Allen-head bolt (for securing the roller lever)	4.90 to 5.88 N•m	M5 hexagon socket head cap screw
(3)	Allen-head bolt (for securing the adjustable rod lever)	0.88 to 1.08 N•m	M8 hexagon socket set screw
(4)	Terminal screw	0.59 to 0.78 N•m	M3.5 screw
(5)	Connector	1.77 to 2.16 N•m	G1/2orPg13.5orM20or 1/2-14NPT
(6)	Unit mounting screw	4.90 to 5.88 N•m	M5 hexagon socket head cap screw

Wring

In the case of mounting screw

- Use M3.5-nylon insulation covered crimp terminals (round type) for wiring.
Ex.) V1.25-M3.5(RAP1.25-3.5) (J.S.T. Mfg. Co.,Ltd.)
- Appropriate wire size is AWG16 (1.25mm²).
- Do not supply electric power when wiring. Otherwise electric shock may result.
- Do not pull out the wires with excessive force. It may cause of coming off the wire.
- Use crimp terminals for wiring.
- In the case of lump unit, to avoid interference between lump unit and crimp terminals, wire according to right wiring figure. Attach the lump unit spring to terminal screw certainly otherwise it's possible to be destroyed or shorted.
- The ground terminal is only installed on models with ground terminals.

In the case of prewired connector and direct connector

- Holding the connector certainly when pulling connector.
- Don't pull the cable holding it.

How to handle

Changing direction of the head

- By removing the screws in the two corners of the head, the head can be set any of four directions. Be sure to change the plunger for internal operations at the same time.

Built-in Switch

- Do not remove or replace the built-in switch.

Overtravel Markers

- All Switches with Roller Lever Actuators except for Switches with Fork Lever Locks and Low-temperature Switches have a set position marker plate.
- To allow the roller lever type actuator to travel properly, set the roller lever according to the dog or cam stroke so that the arrowhead of the lever is positioned within overtravel markers as shown.

Connectors

- Tighten the connector with the appropriate torque to prevent deformation.
- Use the OMRON type SC connector series, which is prepared separately, suitable for outer diameter of cable and inner diameter of seal rubber.
- Make sure to wrap the connector with the seal tape, except the connector which has O-ring, to keep the sealability.
- To conform to CSA, use a CSA certified water tight treated conduit hub.
- Even when the connector is assembled and set correctly, the end of the cable and the inside of the Switch may come in contact. This can lead to malfunction, leakage current, or fire, so be sure to protect the end of the cable from splashes of oil or water and corrosive gases.

Microload Applications

- The switch contacts can be used both for standard loads and microloads, but once a contact has been used to open and close a load it can no longer be used for lower loads. Doing so will damage the contact surface and reduce contact reliability.
- If an inrush current or other sudden load occurs during a switch operation, the switch will begin to degrade severely which can result in reduced durability. Use a contact protection circuit if required.

Indicator

Indicator-equipped switch has contacts and indicator in parallel. When contacts are open, leakage current flows through the indicator circuit and may cause load's malfunction. Please check the load's OFF current before use the indicator-equipped switch. Leakage current may cause load malfunction (i.e., the load may remain ON). Make sure that the load operating current is higher than the leakage current. For countermeasures, refer to technical support on your OMRON website.

Terminal Plate

- By using the Terminal Plate (sold separately), as shown in the following diagram, the Switch can be used as a single-polarity double-break switch.

Model WL-N TERMINAL PLATE

Terminal Plate Mounting Diagram (with Two Terminal Screws Removed)

Using a WL□-2N Switch Mounted from the Side

If you replace a previous Switch with a WL□-2N-N Switch, a Mounting Plate (sold separately) is available to maintain mounting compatibility. If you use the Mounting Plate, the Switch mounting holes and actuator position will be compatible. (The position of the dog will not need to be changed.)

Operation

- Carefully determine the position and shape of the dog or cam so that the actuator will not abruptly snap back, thus causing shock. In order to operate the Limit Switch at a comparatively high speed, use a dog or cam that keeps the Limit Switch turned ON for a sufficient time so that the relay or valve will be sufficiently energized.
- The method of operation, the shape of the cam or dog, the operating frequency, and the travel after operation have a large influence on the durability and operating accuracy of the Limit Switch. The cam or dog must be smooth in shape.

- Appropriate force must be imposed on the actuator by the cam or dog in both rotary operation and linear operation. If the dog touches the lever as shown below, the operating position will not be stable.

- Unbalanced force must not be imposed on the actuator. Otherwise, wear and tear on the actuator may result.

- With a roller actuator, the dog must touch the actuator at a right angle. The actuator or shaft may deform or break if the dog touches the actuator (roller) at an oblique angle.

- Make sure that the actuator does not exceed the OT (overtravel) range, otherwise the Limit Switch may malfunction. When mounting the Limit Switch, be sure to adjust the Limit Switch carefully while considering the whole movement of the actuator.

- The Limit Switch may soon malfunction if the OT is excessive. Therefore, adjustments and careful consideration of the position of the Limit Switch and the expected OT of the operating body are necessary when mounting the Limit Switch.

- When using a pin-plunger actuator, make sure that the stroke of the actuator and the movement of the dog are located along a single straight line.

Others

- For long term (over a year) storage, check according to Operating characteristics, Contact resistance and Dielectric strength at least. And check with using condition.
- The durability of the Switch is greatly affected by operating conditions. Evaluate the Switch under actual working conditions before permanent installation and use the Switch within a number of switching operations that will not adversely affect the Switch's performance.

Using the Switches

Item	Applicable models and Actuators	Details
<p>Changing the Installation Position of the Actuator By loosening the Allen-head bolt on the actuator lever, the position of the actuator can be set anywhere within the 360°. With Indicator-equipped Switches, the actuator lever comes in contact with the top of the indicator cover, so use caution when rotating and setting the lever. When the lever only moves forwards and backwards, it will not contact the lamp cover. (This does not apply to Long-life Switches.)</p>	<p>Roller Levers: (WLCA2-N, WLCA2-2-N, WLCA2-2N-N, WLG2-N, WLCA2-7-N, WLCA2-8-N, WLGCA2-N, WLMCA2-N, WLMG2-N, WLMGCA2-N) Adjustable Roller Levers: (WLCA12-N, WLCA12-2-N, WLCA12-2N-N, WLG12-N) Adjustable rod lever: (WLCL-N, WLCL-2-N, WLCL-2N-N, WLGL-N, WLCAL4-N, WLCAL5-N)</p>	
<p>Changing the Orientation of the Head By removing the two screws of the Head, the Head can be set in any of the four directions. Be sure to change the plunger for internal operations at the same time. The roller plunger can be set in either of two positions at 90°</p>	<p>Roller Levers: (WLCA2-N, WLCA2-2-N, WLCA2-2N-N, WLG2-N, WLCA2-7-N, WLCA2-8-N, WLGCA2-N, WLMCA2-N, WLMG2-N, WLMGCA2-N) Adjustable Roller Levers: (WLCA12-N, WLCA12-2-N, WLCA12-2N-N, WLG12-N) Adjustable rod lever: (WLCL-N, WLCL-2-N, WLCL-2N-N, WLGL-N, WLCAL4-N, WLCAL5-N) Horizontal plunger (WLSD□-N) Sealed top-roller plunger (WLD28-N) Note: Does not include the -RP60 Series or -141 Series.</p>	
<p>Changing the Operating Direction By removing the Head on models which can operate on one-side only, and then changing the direction of the operational plunger, one of three operating directions can be selected.</p>	<p>Roller Levers: (WLCA2-N, WLCA2-2-N, WLCA2-2N-N, WLG2-N, WLCA2-7-N, WLCA2-8-N, WLGCA2-N, WLMCA2-N, WLMG2-N, WLMGCA2-N) Adjustable Roller Levers: (WLCA12-N, WLCA12-2-N, WLCA12-2N-N, WLG12-N) Adjustable rod lever: (WLCL-N, WLCL-2-N, WLCL-2N-N, WLGL-N, WLCAL4-N, WLCAL5-N)</p>	<p>The output of the Switch will be changed, regardless of which direction the lever is pushed. The output of the Switch will only be changed when the lever is pushed in one direction.</p> 
<p>Installing the Roller on the Inside By installing the roller lever in the opposite direction, the roller can be installed on the inside. (Set so that operation can be completed within a 180° level range.)</p>	<p>Roller Levers: (WLCA2-N, WLCA2-2-N, WLCA2-2N-N, WLG2-N, WLCA2-7-N, WLCA2-8-N, WLGCA2-N, WLMCA2-N, WLMG2-N, WLMGCA2-N) Fork lever lock: (WLCA32-4□-N) Note: Except for Switches with variable roller levers.</p>	

Item	Applicable models and Actuators	Details
<p>Adjusting the Length of the Rod or Lever The length of the rod or lever can be adjusted by loosening the Allen-head bolt.</p>	<p>Adjustable Roller Levers: (WLCA12-N, WLCA12-2-N, WLCA12-2N-N, WLG12-N) Adjustable rod lever: (WLCL-N, WLCL-2-N, WLCL-2N-N, WLGL-N, WLCAL4-N)</p>	 <p>Adjustable Roller Levers: Adjustment range radius: 25 to 89 mm. Loosen this Allen-head bolt and adjust the length of the lever.</p> <p>Adjustable Rod Levers: Adjustment range radius: 24 to 140 mm. Loosen this Allen-head bolt and adjust the length of the rod.</p>
<p>Selecting the Roller Position There are four types of Switches with Fork Lever Locks for use depending on the roller position.</p>	<p>Fork lever lock: (WLCA32-4□-N)</p>	 <p>WLCA32-41-N, WLCA32-43-N, WLCA32-42-N, WLCA32-44-N</p> <p>An explanation of the operation of fork lever locks is provided after this table.</p>

Operation of Fork Lever Locks

A Switch with a Fork Lever Lock is constructed so that the dog pushes the lever to invert the output and this inverted state is maintained even after the dog moves on.

If the dog then pushes the lever from the opposite direction, the lever will return to its original position.

Example

NC terminal: ON

NO terminal: ON

NO terminal: ON

Limit Switch Connectors

Connectors (SC Series)

Cable cables and flexible tubes with various diameters are used to connect machine tools and controllers with Limit Switches. To ensure the watertightness of the edges of the conduits, use an SC Connector that is suitable for the external diameter of cable and model of Limit Switch.

Ordering Information

Connector for Cable Cable

Conduit	Applicable cable	Inner diameter (D) of seal rubber	External diameter of cable		Model	Applicable model
			Min.	Max.		
JIS B 0202 G $\frac{1}{2}$	Cable cable (general-purpose)	7 mm	5.5 mm	7.5 mm	SC-1M	WL-N, D4A-□N, D4B-□N, ZE, ZV, ZV2, XE, XV, XV2
		9 mm	7.5 mm	9.5 mm	SC-2M	
		12.5 mm	11 mm	13 mm	SC-3M	
		14 mm	12 mm	14 mm	SC-4M	
		11 mm	9 mm	11 mm	SC-5M	
	Cable cable (anti-corrosive)	7 mm	5.5 mm	7.5 mm	SC-21	
		9 mm	7.5 mm	9.5 mm	SC-22	
		12.5 mm	11 mm	13 mm	SC-23	
		14 mm	12 mm	14 mm	SC-24	
		11 mm	9 mm	11 mm	SC-25	
$\frac{1}{2}$ -14NPT	Cable cable	7 mm	5.5 mm	7.5 mm	SC-1PT	D4A-□N
		9 mm	7.5 mm	9.5 mm	SC-2PT	
		12.5 mm	11 mm	13 mm	SC-3PT	
		14 mm	12 mm	14 mm	SC-4PT	
		11 mm	9 mm	11 mm	SC-5PT	

Note: Please use sealing tape with SC Connectors. SC-1M to SC-5M, however, are provided with an O-ring (NBR) and therefore sealing tape is not necessary to ensure a proper seal.

Simple Connectors (Not Suitable for Locations Subject to Oil or Water)

Conduit	Applicable cable	Inner diameter (D) of seal rubber	External diameter of cable		Model	Applicable model
			Min.	Max.		
JIS B 0202 G $\frac{1}{2}$	Cable cable	10.6 mm	8.5 mm	10.5 mm	SC-P2	WL-N, D4A-□N, D4B-□N, ZE, ZV, ZV2, XE, XV, XV2
Pg13.5		9.6 mm	7.5 mm	9.5 mm	SC-P3	WL□-G-N
JIS B 0202 G $\frac{1}{2}$		9 mm	7.5 mm	9 mm	SC-6	WL-N, D4A-□N, D4N *, D4N-□R *, D4B-□N, ZE, ZV, ZV2, XE, XV, XV2

Note: Simple connector are made of resin. If more sealing capability is required, use one of SC-1M to SC-5M, which have metal casings. Models marked with an asterisk (*) however, can only be used with resin connectors.

Dimensions and Structure

(Unit: mm)

Connectors for Cabtire Cable

As for models without an O-ring, please use sealing tape with SC Connectors.

Metal Models without O-ring

* Diameter of Part Marked with Asterisk

Model	Inner diameter (D) of sealed rubber	Internal diameter (E) of washer	Applicable cable
SC-21, -1M, -1PT	7 mm	10.4 mm	5.5 to 7.5-mm dia.
SC-22, -2M, -2PT	9 mm	13.2 mm	7.5 to 9.5-mm dia.
SC-23, -3M, -3PT	12.5 mm	14.6 mm	11 to 13-mm dia.
SC-24, -4M, 4PT	14 mm	14.6 mm	12 to 14-mm dia.
SC-25, -5M, -5PT	11 mm	13.2 mm	9 to 11-mm dia.
SC-6	9 mm	10 mm	7.5 to 9-mm dia.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
